I have created a new app and added the relevant code (image 3) I have checked the built in app builder and it looks like this Now, how would I add the text below the image 2 to the current template I created in image 1? A: You can add a new section in your template and use the App Builder to add the text. In this case you'd add the section like so: `{{#section 'your-app-name'}} Test Text {{/section}}` You can then access this section in your app and use the app builder to add text. I'll provide code below: `{{app_builder'my-section'}}` Now if you wish to add this dynamically, you need to

track which section is currently being rendered. You can do this by hooking into the \$.appBuilder function:

```
$.appBuilder.referToSection = function() {  
  var section = $(this).prop('name'); // Put logic here  
  // to figure out if you're in the title area // and add  
  // some text here $(this).addClass('app-  
  builder__current-section'); };
```
